

High Speed Wireless Broadband

If you are able to see **Ringland Church** from your property, then you could benefit from an exciting new project to install Wireless Broadband brought to you by **WiSpire**. Distance from the BT Exchange in Drayton limits the Internet speed available over the phone line for most Ringland residents, but the wireless link will guarantee a high speed connection at all times.

WiSpire Wireless Broadband will deliver
6mb download speed, with a 1mb upload for residential use
Bespoke Business services are also available

Why do I need High Speed Broadband?

- Streaming movies and watching live TV with BBC iPlayer, SKY Go & LoveFilm
- Streaming and downloading music from websites such as iTunes & Amazon
- Improved online gaming experience with Xbox, Playstation & PC's.
- Lowering leased line price (Business)
- Fast Bi-Directional speeds (Business)
- Fast communication for online trading (Business)
- Fast access for remote workforce (Business)
- Fast uploading of pictures and video to social networking sites such as Facebook
- Calling friends and family using Voice or Video Conferencing
- Opening email attachments without delay or lag

Please visit the website below to find out more and register your interest (without commitment) and also test the speed of your existing internet link to see if you will really benefit. If there is sufficient interest, we will have our wireless link during Summer 2012 and Ringland residents will be able to benefit from improved internet access.
